C:\Users\91944>docker help

Usage: docker [OPTIONS] COMMAND

A self-sufficient runtime for containers

Options:
  --config string      Location of client config files (default
                        "C:\Users\91944\.docker")
  -c, --context string  Name of the context to use to connect to the
                        daemon (overrides DOCKER_HOST env var and
                        default context set with "docker context use")
  -D, --debug           Enable debug mode
  -H, --host list       Daemon socket(s) to connect to
  -l, --log-level string Set the logging level
                        ("debug"|"info"|"warn"|"error"|"fatal")
                        (default "info")
  --tls                Use TLS; implied by --tlsverify
  --tlscacert string    Trust certs signed only by this CA (default
                        "C:\Users\91944\.docker\ca.pem")
  --tlscert string      Path to TLS certificate file (default
                        "C:\Users\91944\.docker\cert.pem")
  --tlskey string       Path to TLS key file (default
                        "C:\Users\91944\.docker\key.pem")
  --tlsverify           Use TLS and verify the remote
  -v, --version         Print version information and quit

Management Commands:
  builder               Manage builds
  buildx*              Docker Buildx (Docker Inc., v0.9.1)
  compose*             Docker Compose (Docker Inc., v2.12.0)
  config               Manage Docker configs
  container             Manage containers
  context              Manage contexts
  dev*                 Docker Dev Environments (Docker Inc., v0.0.3)
  extension*           Manages Docker extensions (Docker Inc., v0.2.13)
  image                Manage images
  manifest              Manage Docker image manifests and manifest lists
  network              Manage networks
  node                 Manage Swarm nodes
  plugin               Manage plugins
  ps                    View the running containers
  pull                 Pull an image from a registry
  push                 Push an image to a registry
  rebuild              View the package-based Software Bill of Materials (SBOM) for an image (Anchore Inc., 0.6.0)
  scan*               Docker Scan (Docker Inc., v0.21.0)
  secret               Manage Docker secrets
  service              Manage services
  stack                Manage Docker stacks
```
